

Digital Workshops with RedDoor Managed IT Services

Volunteers from Local Tech Company RedDoor Managed IT Services are running digital workshops in Croydon libraries aimed at older residents. The workshops will focus on assisting local residents to have the right access, skills, motivation and trust to be confident online and use a range of services. Our friendly expert IT team will cover:

- Getting online and staying safe whilst you're there
- Using email and how to set up your very own email account
- How to get the best from an online account with Croydon Council
- Online shopping and online banking
- As well as a quick overview of social media.

Workshops will last for two hours and take place at local libraries across the borough. Please speak to your local library or book your place at: digital.workshops@croydon.gov.uk.
